

ImaGen: AI Image Generator in Android and IOS platform

Presented by

Md. Rafi Hasan

ID: 191-15-12837

Md.Mohtasim Billah

ID:191-15-12577

Supervised by

Nazmun Nessa Moon

Associate Professor

Department of CSE

Daffodil International University

Dhaka

Saturday 7th January 2023

Introduction

Motivation

Objectives

Project Details

Activities	Duration in week	Total week
Research	W1, W2	2
Specifications	W2, W3	2
Planning	W3, W4	2
Design	W4, W5	2
Development	W5, W6, W7,W8	4
Testing	W8, W9	2
Assessment	W10, W11	2
Documentation	W11, W12	2
Software release	W12	1

Hardware Requirements

- Computer
- Internet connection

Software Requirements

- Visual Studio as Editor
- Emulator
- Flutter Framework
- Dart Programming Language
- Firebase

Diffusion model

Testing Result

Advantages

- This Platform run Android and IOS Operating System.
- This app is added Four Language in search prompt.
- User Get Their Realistic Image in Different Filters.

Limitations

- No Website application
- No Customization, that means that users can't make images that are perfectly suited to their project, brand etc.
- Don't upload the image

Future Scope

- We can add image colorizer, Restorer.
- We can add object remover, background remover.
- We can add social media post categories, for example, Facebook post, Instagram post, story, Twitter post, you tube banner, you tube thumbnail etc.

Conclusion

This app will help the user to get his desired image in a very short time. Using this project As a result, users can save their time and money. From the future we will add new features according to users requirements.
