Professional summary

A motivated software developer with a solid foundation in computer science and engineering. Through practical experience and training, I have built a diverse skill set in software development and machine learning. I aim to contribute my technical expertise and passion for innovation to impactful projects, driving growth and excellence in cutting-edge technology environments.

Experience

Software Engineer, *BASIS Institute of Technology (BITM)* Feb 2023 – May 2023 Job Responsibilities: (Intern) UI Design, Team Project. Conceptualizing 4+ visuals based on requirements per Month.

Volunteer, *DIU Computer & Programming Club* Jan 2022 – May 2022 Job Responsibilities: Guarding Exam Hall, Problem Tester in 4 Contests.

Project

ImaGen (Jan2022 – Feb 2023): Develop an AI-powered image generator that creates images based on text prompts.

Project's achievements and potential impact in fields like art, design, and marketing.

Technology: Flutter, Dart, Python, TensorFlow/PyTorch, GANs (Generative Adversarial Networks), or diffusion models.

Massing App (Jan2022 – Feb 2023): A full featured Flutter chat application with video, voice, text, images, emoji, and real time notifications.

Technology: Flutter, Dart, MongoDB/PostgreSQL

E-commerce App (Jan2022 – Feb 2023): This e-commerce app aims to create a seamless and engaging shopping experience, helping users discover and purchase products effortlessly while providing merchants with effective management tools.

Technology: Flutter, Dart, MongoDB/PostgreSQL

Skills

Technologies: C/C++, C#, .NET, JavaScript, TypeScript, Node.js, Python, Java, Android, SQL, HTML, CSS, React, Flutter, Dart.

Cloud Services: App Insight, App Configuration, Key Vault, Blob Storage, Redis Cache, Google Analytics.

Development Tools: Git, Visual Studio, Azure DevOps, Postman, Docker, Linux.

Microsoft Office: Excel, Word, PowerPoint.

Problem Solving: Solved more than 600 data structures and algorithmic problems across various programming platforms such as *Beecrowd*, *Codeforce*, *HackerRank*.

Training

Mobile Application Development – Android & IOS, *BASIS Institute of Technology & Management (BITM)*, 01 Nov 2021 – 01 Jan 2022 (150 hrs.)

DIU Computer & Programming Club, *Daffodil International University*, 03 Oct 2022 – 03 Jan 2023

Education

Master's in Computer Science Engineering

Comilla University

Oct 2024 – Ongoing

B. Sc in Computer Science and Engineering

Daffodil International University

Jan 2019 -Dec 2023

CGPA: 3.21 out of 4.00

Certificates

Applied Data Science with Python Specialization, *University of Michigan*, 2022.

Big Data Specialization, *University of San Diego*, 2022

Feature Engineering, *Google Cloud*, 2022

Flutter Google Analysis, *Google Cloud*, 2022.

Dart Programming, *Google Cloud*, 2022.

Achievements

5th in DIU Intra section University Programming Contest 2021, standing, Dec 2021
